Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/23/03 has been entered.

Amendment, filed on 9/22/03 has been considered and entered.

Claim 1 has been amended and claims 8-13 are added.

Allowable Subject Matter

Claims 1-6, and 8-13 are allowed over the prior art of record.

Examiner's Reasons for Allowance

The following is an examiner's statement of reason for allowance:

The rejections of claims 1-3, and 5 under 35 U.S.C. 102(b) have been withdrawn, since Swank in '432 patent does not disclose or suggest that the openings 150 can adjust the tension of the implosion band 134. Openings are formed to accommodate welding electrodes, which are used to secure lug to the band material. Though the folded part 136 of the band can adjust the tension, however, prior art does not teach or suggests a plurality of tension adjusting features formed in a rear section of the tension band located opposite the front and aft of the blend radius.

Regarding claim 8, the prior art of record neither shows nor suggests a combination of limitations set forth in claim 8, particularly comprising the limitation of a

plurality of tension adjusting features formed in a rear section of the tension band located aft of the inside blend radius and at a position apart from the mounting lug.

Claims 9-13 are allowed for being dependent on allowed base claim 8.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
